

Add polymorphism

- declarations
- expressions
- functions (patterns could be polymorphic type)
- function application

Next week: commit at least one thing from each team member's slice to semantic analyzer

Nov 20: Semantic Analyzer – translate AST to SAST (Checks everything the parser doesn't check)

- Add warnings for unused declarations (different from errors)
- Steps:
 - Implementation of Symbol table – Lianne by Friday meeting
 - Implementation of Environment – Lianne by Friday meeting
 - Then slices – everyone at least one thing by next meeting

Dec 4: End-to-End “Hello World” Compilation (+ print functionality)
